Tom 196–Tom 201, 1971

Vol. 12, Nos. 1–6 January–December 1971 Pages 1–1849

ANNUAL INDEX OF AUTHORS

Abramovič, Ju. A. *Injective envelopes of normed lattices* 511

Agababjan, K. G. *On the algebra of neuron matrices* 1201

Agranovskiĭ, M. L. *Invariant algebras on the boundaries of symmetric domains* 371

Ahmedov, Š. A. *On the extension of generalized solutions of differential equations defined in the neighborhood of characteristic subspaces* 416

On the Cauchy problem in a class of generalized functions 1751

Aĭzenberg, L. A. *Polynomials orthogonal to holomorphic functions of several complex variables and an analogue of the Riesz theorem* 1044

Aksent'ev, L. A. See Avhadiev, F. G.

Aleĭner, R. Š. *A generalization of Stein's theorem on admissibility* 285

Aleksandrov, A. D. *Mapping families of cones* 582

Ambarcumjan, R. V. *On random plane mosaics* 1349

Andreev, V. A.; Kazarinov, Ju. F. and Jakubovič, V. A. *Synthesis of optimal controls for linear inhomogeneous systems in problems of quadratic functional minimization* 1049

Andrianov, A. N. and Fomenko, O. M. *Distribution of the norms of the hyperbolic elements of the modular group and the class number of indefinite binary quadratic forms* 217

Androšč̆uk, A. A. *Transformation operators and the uniqueness theorem in the inverse problem for a second-order differential equation with operator coefficients* 687

Andrunakievič, V. A. and Marin, V. G. *Multioperator linear algebras without nilpotent elements* 515

Andrunakievič, V. A. and Rjabuhin, Ju. M. *On decompositions of elements of partially ordered algebraic systems into intersections of prime elements* 692

Fully indempotent rings and the generalized nil-radical 1742

Anikonov, Ju. E. See Lavrent'ev, M. M.

Antonovskiĭ, M. Ja. and Poljakov, V. Z. *On some lattices of topological type and their homomorphisms* 799

Arak, T. *On the rate of convergence of the distribution of the maximum deviation of an estimate of the spectrum of a Gaussian random sequence* 1747

Arhangel'skiĭ, A. V. *On mappings of everywhere dense subsets of topological products* 520

Arhangel'skiĭ, A. V. *On bicompacta hereditarily satisfying Suslin's condition. Tightness and free sequences* 1253
Arharov, L. N. *Limit theorems for the characteristic roots of a sample covariance matrix* 1206
Arkin, V. I. and Levin, V. L. *Extreme points of a certain set of measurable vector functions of several variables and convexity of the values of vector integrals* 1248
A variational problem with functions of several variables and operator restrictions: the maximum principle and existence theorem 1293
Arsen'ev, A. A. *On the singularities of the analytic continuation and the resonance properties of a solution of the dispersion problem for the Helmholtz equation* 476
Aršon, I. S. See Ibragimov, I. I.
Aseev, V. V. *On a modulus property* 1409
Astaf'ev, N. N. *On inverse theorems of generalized duality in convex programming problems* 1082
Avhadiev, F. G. and Aksent'ev, L. A. *Sufficient conditions for univalence of analytic functions* 859
Azarin, V. S. *Regularity of growth of entire functions* 1406
Azizov, T. Ja. *Invariant subspaces and completeness criteria for the root vector system of J-dissipative operators in the Pontrjagin space* Π_κ 1513
Babaev, M.-B. A. See Ibragimov, I. I.
Babič, V. M. *On the asymptotics of the Green's functions of certain wave problems* 1138
Barzdin', Ja. M. *Complexity and accuracy of the solution of initial segments of the problem of occurrence in a recursively enumerable set* 1054
Bavrin, I. I. *Generalized integral representations in the case of a polycylinder* 1
Generalized integral representations in the case of convex polydisc domains 375
On generalizations of Cauchy, Schwarz and Poisson integral formulas 910
Beklemiševa, L. A. *Asymptotic properties of the solutions of a system of differential equations with polynomial right-hand side* 1210
Belinskiĭ, P. P. *On the order of approximation of quasi-conformal maps in space to conformal maps* 1459
Bel'nov, V. K. *Homogeneous spaces* 1057
On metrizable topologies 1552
Berkovič, Ja. G. *Subgroup and normal structure of a finite p-group* 71
Berman, D. L. *An interpolatory analog of Wiener's criterion for the continuity of a function of bounded variation* 152
Bil'man, B. M. *On conditions for the complete continuity of certain multidimensional integral operators with homogeneous kernels* 378
Biluta, P. A. and Kruškal', S. L. *On extremal quasi-conformal mappings* 76
Blohina, G. N. and Kudrjavcev, V. B. *On basic groups in k-valued logics* 1583
Bobylev, N. A. *On the theory of factor-methods for approximate solution of nonlinear problems* 999

Boltjanskiĭ, V. G. *Separability axioms and a metric* 639
Borisov, Ju. F. *Parallel transport along Hölder curves in a Riemannian space*... 587
On a property of a continuous function 1810
Borisov, Ju. F. and Šefel', S. Z. *Surfaces with bounded extrinsic curvature and positive Gauss curvature* 1354
Borisovič, Ju. G. and Sapronov, Ju. I. *On some topological invariants of nonlinear Fredholm mappings* 5
Borok, V. M. and Žitomirskiĭ, Ja. I. *On the Cauchy problem for linear partial differential equations with linearly transformed argument* 1412
Borovikov, V. A. *An upper bound for the existence time of the smooth solution of a quasi-linear hyperbolic system* 1586
Borzov, V. V. *On some applications of piecewise polynomial approximations of functions of anisotropic classes* W_p^r 804
Breĭtbart, Ju. Ja. *On automaton and "zone" complexity of the predicate "to be a kth power of an integer"* 10
Brjuns, V. [Bruins, V.] *A generalized boundary-value problem for an ordinary linear differential operator* 956
Brodskiĭ, V. M. *On operator nodes and their characteristic functions* 696
Brodskiĭ, V. M. and Švarcman, Ja. S. *On invariant subspaces of contractions* 1659
Brudnyĭ, Ju. A. *Piecewise polynomial approximation and local approximations* 1591
Brudnyĭ, Ju. A. and Šalašov, V. K. *Lipschitz spaces of functions* 383
Bruins V. = Brjuns, V.
Buslaev, V. S. *Scattered plane waves, spectral asymptotics and trace formulas in exterior problems* 591
Čaĭkovskiĭ, Ju. V. *On a continuous process of matrix game solution* 1245
Čakmazjan, A. V. *On the theory of dually normalizable m-dimensional surfaces* V_m *in* E_n 206
Čan Za Lik *Series expansions in Mittag-Leffler functions* 1344
Čan Zuĭ Ho and Èskin, G. I. *Boundary value problems for parabolic systems of pseudo-differential equations* 739
Čaplygin, V. F. See Kolesov, Ju. S.
Čarin, V. S. See Poleckih, V. M.
Čarušnikov, V. D. *On optimal approximate methods for the solution of linear problems* 1039
Čeresiz, V. M. *On uniform attraction in periodic systems* 209
On the weak completeness of the space conjugate to a convergence space 1695
Černicina, V. Ja. See Mysovskih, I. P.
Černyšov, G. L. *On the Friedrichs-Lewy inequality for B-hyperbolic operators* 1841
Čistjakov, G. P. *On the conditions under which probability laws with non-analytic characteristic functions belong to class* I_0 1654
Čudnovskiĭ, D. V. See Čudnovskiĭ, G. V.

Čudnovskiĭ, G. V. and Čudnovskiĭ, D. V. *Regular and descending incomplete ultrafilters* 901
Čunihin, S. A. *Indexials and subgroups* 578
On block properties of finite groups 951
Cygankov, A. A. *Harmonic polynomials orthogonal on a plane curve* 574
Danilov, V. A. *On the smoothness of quasi-conformal mappings in closed domains* 220
Davydov, Ju. A. *On some analogs of the arcsine law for random walks* 822
Deĭč, V. G. *A local stationary method in the theory of scattering for a pair of spaces* 648
Dement'eva, A. M. *On difference methods of constructing an implicit function* ... 1708
Dezin, A. A. *Global solvability of multidimensional difference equations and a construction of Spencer type* 25
Dikanskiĭ, A. S. *Problems adjoint to elliptic pseudodifferential boundary value problems* 1520
D'jakonov, E. G. *On approximate methods for the solution of operator equations* 826
On some operator inequalities and their applications 921
Dmitriev, V. I. *On the Lions-Peetre method for the construction of interpolation spaces* 864
Domanskiĭ, V. K. *On an application of generalized function theory to the theory of antagonistic games* 1087
Dragalin, A. G.; Ljubeckiĭ, V. A. and Fukson, V. I. *Definable sequences of countable ordinals* 341
Dubinskiĭ, Ju. A. *Boundary value problems for some classes of high-order differential operator equations* 30
On a nonlinear problem of Zaremba type for a hyperbolic equation 1417
On some differential-operator equations of a general kind 1763
Dunduchenko, L. E. *On the Riemann-Hilbert problem for a multiply connected domain* 34
Dybov, P. T. *Solvability of a fourth-order elliptic equation on the plane in the class of functions of bounded growth at infinity* 1152
On solvability in the plane of an elliptic equation of order 2n in a class of functions with a growth condition at infinity 1602
Dynkin, E. B. *Some probability models for a developing economy* 1422
Dzagnidze, O. P. *On some boundary properties of functions harmonic in a sphere* 918
Džavadov, M. G. and Vagabov, A. I. *On a boundary value problem for a second-order elliptic system in a halfstrip* 478
Džuraev, A. *On an analog of the Riemann-Hilbert boundary value problem for a system of equations of composite type* 160
On a method of investigating singular integral equations in a plane bounded region 653
The effect of the regular part in singular integral equations in a two-dimensional bounded region 710

Èfendiev, R. S. *Asymptotic solution of a boundary value problem for an elliptic equation degenerating with respect to a small parameter into a parabolic equation* 744

Efremovič, V. A.; Loginov, È. A. and Tihomirova, E. S. *Equimorphisms of Riemannian manifolds* 392

Egorov, A. I. *On motions in spaces with a general affine connection* 344

Egorov, Ju. V. *On the structure of subelliptic operators* 960

Èĭdel′man, S. D. (see also Matiĭcuk, M. I.)

Èĭdel′man, S. D. and Porper, F. O. *On the asymptotic behavior of solutions of parabolic systems with dissipation* 471

Emeličev, V. A. *On the theory of discrete optimization* 761

Èskin, G. I. See Čan Zuĭ Ho.

Fazylov, F. N. See Lavrent′ev, M. M.

Fedorčuk, V. V. *An example of a homogeneous bicompactum with noncoincident dimensions* 989

Fedorjuk, M. V. *Composition formulas for pseudodifferential operators and the stationary-phase method* 138

Feĭgin, V. I. *Boundary value problems for quasi-elliptic equations in noncylindrical regions* 634

Fel′dman, G. M. See Ljubič, Ju. I.

Fel′dman, I. A. *On an iteration method for the equation of radiant energy transfer* 1034

Fomenko, A. T. *The multidimensional Plateau problem in extraordinary theories of homology and cohomology* 1508

Fomenko, O. M. See Andrianov, A. N.

Freud, Géza *On an inequality of Markov type* 570

On approximation with weight $e^{-x^2/2}$ *by polynomials* 1837

Fukson, V. I. (see also Dragalin, A. G.)

On a homogeneous Suslin continuum 462

Fursikov, A. V. *Boundary value problems for some classes of degenerating elliptic operators* 506

Gabasov, R.; Kirillova, F. M. and Minjuk, A. S. *Controllability of linear two-parameter discrete systems* 1258

Gadžiev, A. D. See Ibragimov, I. I.

Gaĭmnazarov, G. See Timan, M. F.

Gaĭnov, A. T. *Some classes of monocomposition algebras* 1595

Galstjan, F. N. *Local analogs of a theorem of Heyde* 596

Gasymov, M. G. *On the theory of polynomial operator bundles* 1143

On the theory of evolutional equations of regular type 1298

Gehtman, M. M. *On some analytic properties of the resolvent kernel of an ordinary differential operator of even order on a Riemann surface* 1755

Gel′fand, I. M. and Každan, D. A. *Some problems of differential geometry and the calculation of cohomologies of Lie algebras of vector fields* 1367

Gel′fand, I. M. and Ponomarev, V. A. *Quadruples of subspaces of a finite-dimensional vector space* 535

Gel′man, A. E. *A fixed point principle* 813

Geriš, V. [Gerisch, W.] *A remark on the work of N. K. Bari on biorthogonal systems and bases in Hilbert space* 1517
Gerisch, W. = Geriš, V.
Germeĭer, Ju. B. *On two-person games with a fixed sequence of moves* 913
Gluskin, L. M. *On dense extensions* 89
Gluško, V. P. *Smoothness of solutions of degenerating differential equations in Banach space* 701
Gogoladze, L. D. *On (H, k) summability of multiple trigonometric Fourier series* 1555
Gohberg, I. C. and Špiegel′, E. M. *A projection method for the solution of singular integral equations* 289
Gol′dman, M. A. and Kračkovskiĭ, S. N. *On a class of perturbations of a linear closed operator with a closed range* 644
Golovin, V. D. *Duality for cohomology with compact carrier* 1148
Gončarova, S. F. See Gudikov, P. M.
Gorbačuk, M. L. and Kočubeĭ, A. N. *Selfadjoint boundary value problems for certain classes of differential-operator equations of higher order* 1759
Gorbunov, A. D. *On a new approach to the construction and justification of methods of the Adams type* 705
Gordin, M. I. *Exponentially fast mixing* 331
Gorin, E. A. *Some examples concerning algebraic equations in function algebras* 1371
Grigor′ev, V. P. *On solvability of mixed problems for a class of quasi-linear differential equations* 19
Grin′, A. N. *On the theory of branching of solutions of a nonlinear equation in a multidimensional case of branching* 1599
Gudivok, P. M.; Gončarova, S. F. and Rud′ko, V. P. *On the algebra of integral p-adic representations of a finite group* 817
Gudkov, D. A. *Construction of a new series of M-curves* 1559
Gulisašvili, A. B. *Fourier transforms of monotonic functions and the distribution function* 336
Guščin, A. K. and Mihaĭlov, V. P. *On stabilization of the solution of the Cauchy problem for a one-dimensional parabolic equation* 419
Gutljanskiĭ, V. Ja. *The stratification of a class of univalent analytic functions* 155
Hadžiev, Dž. See Sarymsakov, T. A.
Harlamov, B. P. *The representation of a stochastic process by flows of first occurrences* 142
Hasʹminskiĭ, R. Z. See Ibragimov, I. A. and Nevelʹson, M. B.
Havinson, S. Ja. *Some approximation theorems involving the magnitude of the coefficients of the approximating functions* 366
Himčenko, B. N. See Kamynin, L. I.
Hovanskiĭ, G. S. and Silaeva, E. A. *On nomographic representation of generalized equations of third and fourth nomographic order, and successive linear interpolation formulas in tables with several entries* 1285

Hryptun, V. G. *On a certain representation of infinitely differentiable functions* 1078

Ibragimov, I. A. and Has'minskiĭ, R. Z. *On the limiting behavior of Bayes estimates and maximum likelihood estimates* 831

Ibragimov, I. A. and Maslova, N. B. *Average number of real roots of random polynomials* 1004

Ibragimov, I. I. and Aršon, I. S. *Completeness of some systems of analytic functions* 605

Ibragimov, I. I. and Babaev, M.-B. A. *Methods for finding functions deviating least from functions of several variables* 540

On estimates of best approximations of a function of several variables by sums of two functions of a smaller number of variables 1768

Ibragimov, I. I. and Mehtiev, I. G. *On the distribution of the zeros of partial sums of Taylor-Dirichlet series* 1092

Ibragimov, I. I.; Gadžiev, A. D. and Šahverdiev, V. M. *On conditions for monotonicity of the sequence of derivatives of Gel'fond-Bernštein polynomials* 1162

Il'in, V. A. *On the equiconvergence of expansions in eigenfunctions and in an N-fold Fourier integral* 869

Il'in, V. A. and Moiseev, E. I. *On spectral decompositions corresponding to an arbitrary nonnegative selfadjoint elliptic operator of second order* ... 545

Iljuškin, V. A. *Manyvalued character of grammatical analysis of context-free languages* 1376

Manyvalued character of grammatical analysis of linear context-free languages 1717

Imrih, V. and Stockiĭ, È. *On optimum embeddings of metrics in graphs* 1379

Ioffe, A. D. *Monotone superpositions in Orlicz spaces* 1719

Iskenderov, A. D. *On a mixed problem for loaded quasi-linear equations of hyperbolic type* 1264

Ivanilov, Ju. P. and Propoĭ, A. I. *On linear dynamic programming problems* 926

Ivanov, V. V. *On optimum minimization algorithms in classes of differentiable functions* 1669

Ivasišen, S. D. *Conjugate Green's operators. Generalized solutions of parabolic problems with normal boundary conditions* 423

Ivriĭ, V. Ja. *The Cauchy problem for nonstrictly hyperbolic equations* 483

Differential equations with multiple characteristics and with no solutions 769

The Cauchy problem for nonstrictly hyperbolic equations of second order 1712

Jakubov, S. Ja. *Solution of mixed problems for partial differential equations by the operator method* 213

Solvability "in the large" of the Cauchy problem for a first order quasilinear hyperbolic system 280

Jakubovič, V. A. (see also Andreev, V. A.)

On the synthesis of optimal controls in a linear differential game on a finite time interval with quadratic payoff functional 1454

Jarv, È. A. See Voronovskaja, E. V.
Judickaja, P. I. *Asymptotic inequalities for maxima of scalar and vector normal random fields* 1289
Kačurovskiĭ, R. I. *On nonlinear operators whose ranges are subspaces* 168
Some problems in the theory of plasticity 237
Generalization of the Fredholm theorems and of theorems on linear operators with closed range to some classes of nonlinear operators 487
Kagan, A. M.; Linnik, Ju. V.; Romanovskiĭ, I. V. and Ruhin, A. L. *Families with "self-control"* 1167
Kamynin, L. I. and Himčenko, B. N. *On the maximum principle for parabolic equations of second order* 1383
Kanarev, L. E. *On similarity of matrices and reduction to canonical forms* 1462
Kanovič, M. I. *On complexity of Boolean function minimization* 720
On domains of definition of optimal algorithms 773
Kapilevič, M. B. *On radial connections of equations of Bessel class* 1773
Karacuba, A. A. *Distribution of power residues and nonresidues in additive sequences* 235
On a certain arithmetic sum 1172
Karapetjanc, N. K. and Samko, S. G. *On discrete Wiener-Hopf operators with oscillating coefficients* 1303
Karaul′naja, L. F. *Birkhoff-Tamarkin asymptotics in operational calculus* 165
Kaškaha, V. E. *On the zeros of the gradient of the solutions of second-order homogeneous elliptic equations in the plane* 1097
Kasymov, K. A. *The asymptotic behavior of the solution of the initial jump problem for a system of differential equations of hyperbolic type with a small parameter in the derivative* 94
Kazarin, L. S. *On some classes of finite groups* 549
Kazarinov, Ju. F. See Andreev, V. A.
Každan, D. A. See Gel′fand, I. M.
Keldyš, Ljudmila *Pseudoisotopy for some locally knotted simple arcs in* E^3 1308
Kiguradze, I. T. *On the periodic solutions of a system of ordinary differential equations with singularities* 777
Kirillova, F. M. See Gabasov, R.
Klebanov, L. B. ; Linnik, Ju. V. and Ruhin, A. L. *Unbiased estimation and matrix loss functions* 1526
Klimov, G. P. *Determination of a fiducial distribution in terms of an invariant pivotal function* 299
Klimov, G. P. and Kuz′min, A. D. *A generalization of the Fisher-Lindley definition of a fiducial distribution* 349
The determination of fiducial probability in terms of confidence probability 931
Kočubeĭ, A. N. See Gorbačuk, M. L.
Kogan, L. A. *Vinogradov's conjecture on the least quadratic nonresidue and representation of numbers by quadratic forms* 965

Kokotov, M. I. *Almost-periodicity of solutions of the equation* $\partial^2 u/\partial t^2 = \Delta u - q(x)u + f(x, t)$ 609
Kolesov, Ju. S. and Čaplygin, V. F. *On the nonoscillation of solutions of singularly perturbed equations of second order* 1268
Kolodiĭ, I. M. *Some properties of generalized solutions of degenerate elliptic equations* 432
Kombarov, A. P. *On Σ-products of topological spaces* 1101
Konjušihina, T. N. *Decomposition of the Kronecker product of two fundamental series representations of the special linear group of matrices of the second kind over the field of quaternions* 1637
Korenbljum, B. I. *Functions holomorphic in a disk and smooth in its closure* ... 1312
Korobov, N. M. *Estimate of a sum of Legendre symbols* 241
Korotkov, V. B. *On integral representations of linear operators* 873
Koršunov, A. D. *On the diameter of graphs* 302
Košelev, A. I. *An inequality for elliptic operators of second order with restricted coefficients* 1009
Kostin, A. V. *On asymptotics of extendable solutions of equations of Emden-Fowler type* 1316
Koval′čik, I. M. *On systems of equations in a function space* 428
Koževnikov, A. N. *On the asymptotics of eigenvalues and on completeness of the root vectors of an operator generated by a boundary value problem with a spectral parameter in a boundary condition* 1564
Kračkovskiĭ, S. N. See Gol′dman, M. A.
Krasičkov-Ternovskiĭ, I. F. *A homogeneous equation of convolution type on convex domains* 396
Krasnosel′skiĭ, M. A. (see also Zabreĭko, P. P.)
Krasnosel′skiĭ, M. A. and Pokrovskiĭ, A. V. *Systems of hysterons* 1388
Krasnosel′skiĭ, V. M. *The projection method for the study of bifurcation of the zero solution of a nonlinear operator equation with multidimensional bifurcation* 967
Krasovskiĭ, N. N. *Programmed absorption in differential games* 1642
Krasovskiĭ, N. N. and Osipov, Ju. S. *Linear differential-difference games* 554
Krasovskiĭ, N. N. and Subbotin, A. I. *Extremal strategies in differential games* 98
Krass, I. A. *The asymptotics of growth trajectories in Gale-von Neumann models* 38
On continuity of the technological mapping of the Neumann-Gale model 658
Kravčenko, V. G. *On the Noether theory of functional equations with non-Carleman shift* 1815
Krehivskiĭ, V. V. and Matiĭčuk, M. I. *On boundary-value problems for parabolic systems with Bessel operator* 1175
Krugljakov, L. Z. *On the projective differential geometry of families of multidimensional planes* 103
Kruglov, V. M. *Convergence of distributions of sums of independent random variables with values in a Hilbert space to the normal and Poisson distributions* 661

Kruškal′, S. L. (see also Biluta, P. A.)
Some local theorems for quasi conformal mappings of Riemann surfaces ... 1062
Krylov, N. V. *On the theory of nonlinear degenerating elliptic equations* 1820
Kudrjàvcev, V. B. (see also Blohina, G. N.)
On S-systems of functions of k-valued logic 1013
Kufarev, B. P. *Capacity of subsets of a Carathéodory boundary and BL-homeomorphism* 1067
Kulakovskaja, T. E. *Necessary and sufficient conditions for the coincidence of core and solution in a classical cooperative game* 1231
Kuperman, L. M. and Repin, Ju. M. *On controllability in infinite-dimensional spaces* 1469
Kurčatov, V. A. *On a method of linear interpolation for the solution of functional equations* 835
Kutateladze, S. S. and Rubinov, A. M. *Some classes of N-convex functions and sets* 665
Supremal generators 1179
Kuzičev, A. S. *F^n-systems of combinatory logic. Generalized arithmetic operators* 878
Kuz′min, A. D. See Klimov, G. P.
Kuz′mina, V. V. See Pinsker, A. G.
Kuz′minov, V. I. and Švedov, I. A. *On the homology induced by cohomology functors* 1465
Kuznecov, N. N. *Weak stability and asymptotics for solutions of finite-difference approximations of differential equations* 1529
Kuznecov, V. V. and Švarc, A. S. *Functors in the category of vector spaces* 41
Labsker, L. G. *Weak convergence of sequences of positive linear functionals.* 669
Lagunov, V. N. *Asymptotic properties of nonlinear pursuit games* 436
Lander, F. I. *Extension of the shift operator in the Pontrjagin space $\Pi_\chi^{(n)}$* 1105
Landis, E. M. *Some properties of quasi-linear elliptic equations* 674
Laričeva, V. *Averaging for systems with variable period* 972
Lašnev, N. S. *On factor mappings of topological spaces* 1674
Lavrent′ev, M. M.; Anikonov, Ju. E. and Fazylov, F. N. *Approximate solution of some nonlinear operator equations* 1473
Lavrik, A. F. *On the moments of the class number of primitive quadratic forms with a negative discriminant* 399
Lazutkin, V. F. *On the asymptotics of the eigenfunctions of the Laplacian* 1569
Leĭbo, I. M. *On closed mappings of infinite-dimensional spaces* 1111
Levin, A. Ju. *Algorithm for the shortest connection of a group of graph vertices* 1477
Levin, V. L. See Arkin, V. I.
Lifanov, I. K. *Imbedding of the topological product of circle-like continua* 1613
Limanskiĭ, V. G. *Comparison theorems for some differential operator equations* 1534
On first order differential operator equations of stable type 1573

Lin, V. Ja. *Algebroid functions and holomorphic elements of homotopy groups of a complex manifold* 1608
Linnik, Ju. V. (see also Kagan, A. M. and Klebanov, L. B.)
Linnik, Ju. V. and Ruhin, A. L. *Convex loss functions in the theory of unbiased estimation* 839
Livšic, L. Z. and Ostrovskiĭ, I. V. *On multidimensional infinitely divisible laws, all of whose components are infinitely divisible* 978
Ljubeckiĭ, V. A. See Dragalin, A. G.
Ljubič, Ju. I. *On the spectrum of a representation of an abelian topological group* 1482
Ljubič, Ju. I.; Macaev, V. I. and Fel'dman, G. M. *On the separability of the spectrum of a representation of a locally compact Abelian group* 1824
Ljuksemburg, L. A. *On infinite-dimensional spaces with transfinite dimension* 1272
Loginov, B. V. and Trenogin, V. A. *On the application of continuous groups in the theory of branching* 404
Loginov, È. A. See Efremovič, V. A.
Lomov, S. A. *Asymptotic solution of differential equations with parameters* 107
Lozanovskiĭ, G. Ja. *On Banach lattices and concave functions* 1114
